Plantenkwekerij De Kemp specializes in growing and cultivation of strawberry and asparagus plants. Alongside we grow, on a small scale, rootstocks for fruit trees.

In the summer, we work mainly with strawberry plants and later in the season with the rootstocks. In the winter season, we work with the asparagus plants. The work will mainly consist sorting plants in the hallway or on the field. Further, common activities are grub, to plant, stripping flowers, weeding in the field or in the greenhouse, and packing plants. You will work in various groups led by a Polish, English or Hungarian speaking manager.

We have good accommodations and facilities available, so you can stay close to the work.

Salary is conformed to the Dutch statutory minimum gross hourly wage. For those who are younger than 22, this is lower than for the others. With good achievements will earn you extra bonus on your normal salary.

Would you like to work at the Kemp, please fill out the application form on this website *formularz Zgloszeniowy*. If we have work for you, we shall invite for an interview.
